

Firelce | A GelTech Solution

Fire Protection Equipment

Firelce® Pro

Link: <https://geltechsolutions.com/fireice/product/fireice-pro/>

Product Information

Category: Agriculture & Biomass, Industrial & Military, Municipal

Product Description

Firelce® Pro is the only fire chemical available that can be used as both a suppressant and a retardant. It knocks down fire with no re-ignition, adhering to burning material, suffocating the fire, and is proven to withstand temperatures of up to 5,000° F. Firelce® Pro breaks the fire triangle on two sides by suffocation and heat removal. Heat transfer within structures and to other material is dissipated and prevented with Firelce® Pro.

Direct Suppression

Firelce® Pro adheres to the source of the heat, regardless of the surface, including ceilings. It is currently being used worldwide by firefighters, first responders and military personnel as a primary water additive to extinguish the most difficult fires, and to help minimize the rate of spread and damage. Firelce® Pro drastically reduces the amount of time and water required to fight fire.

Infrastructure Protection & Values at Risk

Firelce® Pro is utilized by numerous industries to protect a broad range of infrastructure and values at risk in fire operations.

- Wildland Fires - Helps to mitigate the risk in prescribed burning operations, and is used by insurance companies to protect homes threatened by wildland fire.
- Structural Fires - Used as a direct fire suppressant or a medium term retardant for structure protection.
- Electrical Events - Allows manhole fires or electrical events to be extinguished in minutes.
- Vehicle Fires - Effective on all vehicle fires, including rubber tires.

Eco-Friendly

Firelce® Pro is environmentally friendly, and is safe to use around sensitive aquatic and terrestrial ecosystems. The polymer ingredient breaks down naturally in the environment over time and with UV exposure.

Less Corrosive than Competitor Products

Firelce® Pro is safe for use with all pumps and firefighting equipment. When batch mixed, the product is safe to leave in tanks and will not fall out of suspension.

Fast Cleanup

Firelce® Pro is easy to clean up with plain water, and does not require any specialized chemicals or equipment.

Application Methods & Packaging

Firelce® Pro bulk buckets can be applied via batch mixing (Firelce® Eductor) or direct at the end of the nozzle (Firelce® Eductor Nozzle Gun). Lightweight 3.125 oz bottles are designed for backpack pumps & other small applications. Firelce Pro 3.125 oz. bottles are not intended for use with Firelce fire extinguishers.

Product Name	Product No.	U.S. MSRP
Firelce® Pro 3.125 oz. Bottle (6 Pack) Firelce® Wildland Customers Only	FI-FE-6PR	\$90
Firelce® Pro 3.125 oz. Bottle (Case of 24) Firelce® Wildland Customers Only	FI-FE-6CR	\$360
Firelce® Pro 15 lb. Bucket	FI-15B	\$150
Firelce® Pro 15 lb. Bucket (Pallet of 48)	FI-15B48	\$7,200
Firelce® Pro 25 lb. Bucket	FI-25B	\$236
Firelce® Pro 25 lb. Bucket (Pallet of 48)	FI-25B48	\$11,328
